ver.: 1.03

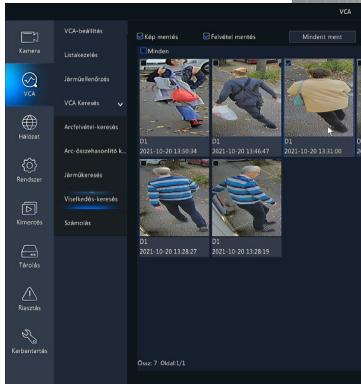

IQ image analytics is able to follow over 20 recognised objects simultaneously.

IQ VCA

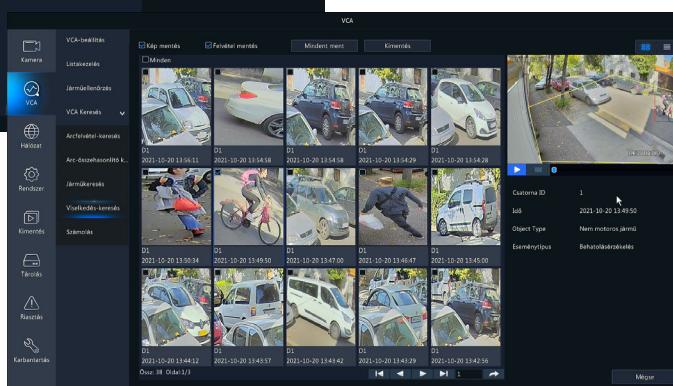

IQ alarm events can be listed in realtime as they occur. The list can be narrowed to selected object types.

VCA behaviour search supports selecting only one object type to list, like human body/passenger...

... or we can query the list of all intrusions, that can also be batch exported to eSATA/USB drive.

Super StarLight

Super Starlight cameras with warm white LED (that can be disabled) supply full color image 0-24h, all day.

In very dim light, when human eye barely sees anything, Starlight cameras still deliver colour image.

Entry level Smart IQ cameras
